Codebook

Coding raw_user_address errors in contacts-export20140617.csv

September 9, 2016

Incomplete information

- 1 — Ward only: only a ward number was entered (i.e. "Ward 3")

- 2 — Zip code only: only a zip code was entered (a four digit number)

- 3 — Street number only: only a street number was entered ($<$ than a four digit number)

- 4 — Zip code + other location info: a zip code was entered with other location information (i.e. a city or street name)

- 5 — Street number + other location info: a street number was entered with other location information (i.e. a city or street name), but is incomplete (e.g. 24 main street, 52 Pretoria)

Incorrect information

- 11 — Phone number: the user entered a phone number (a ten digit number)

- 12 —Random number: the user entered a number that could not be considered a phone number, zip code, or street number.

- 13 — Unrecognized address: the user submitted an address in the correct format with a street number and enough words to form a full address. However, the address was not recognized. This includes misspellings, unconventional abbreviations, and unofficial or fake addresses.

- 14 — P.O Box: only a P.O. Box was entered or a P.O. Box was entered instead of a street number.

- 15 — Ward first: a ward number was entered first or ward was misspelled.

Extraneous information

- 21 — Party name: the user entered a party name or statement of support for a party

- 22 — Expletives: the user entered an expletive.

- 23 — Single character: the user entered only a single letter or punctuation character.

- 24 — Personal responses: the user entered a brief, random reply (hi, hello, thanks, a question, or a statement beginning in "I")

- 25 — Other responses: the user entered a brief reply that could be interpreted as a response to other questions on the survey (yes, no, okay, back, exit, 1. Accept & Join, *100#)
